Make Informed Decisions About Your Healthcare

Kansas Health Ethics, Inc.'s mission is to provide education about the essential role of health ethics in quality of life decision-making.

Do not wait until a medical crisis occurs

before discussing concerns about Advance Directives with your family and your doctor. Chances are that the doctor or your loved one may be waiting for you to start the conversation.

- Durable Power of Attorney for Healthcare
- Living Will
- DNR
- Beginning conversations about end-of-life decisions.

Come to the Clinic

The clinic will give you the tools to begin the conversation with your family and health care workers about end-of-life issues and life-sustaining treatments. KHE supplies the legal documents, copying services, and a notary public for anyone who wishes to complete a durable power of attorney for healthcare, living will, or other directive.

Kansas Health Ethics, Inc.
